

Lesson 6: Student's worksheet

Aim: To connect different wires (L, N & E) in the different terminals of the socket.

Your teacher will provide you with stripped wires of different colours representing the live (L), neutral (N) and earth (E) wires.

Procedure:

1. Identify the live (L), neutral (N) and earth (E) wires.

2. Use appropriate screwdrivers to connect the different wires in their respective terminals of the disassembled sockets (use the same sockets from class activity).

Note to teacher: Provide each group of students with a socket. Allow students to choose the type of socket they will work with.
