

# ART & DESIGN

## Student's Worksheets: GRADE 8 Lesson 6

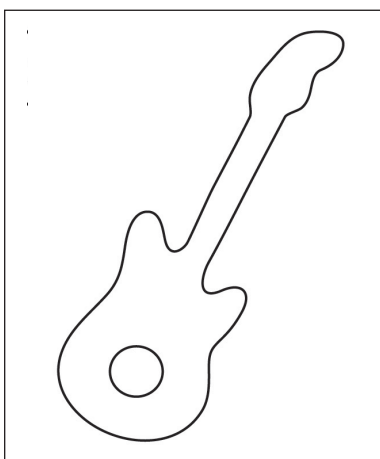

### Create a string block to create motifs and patterns

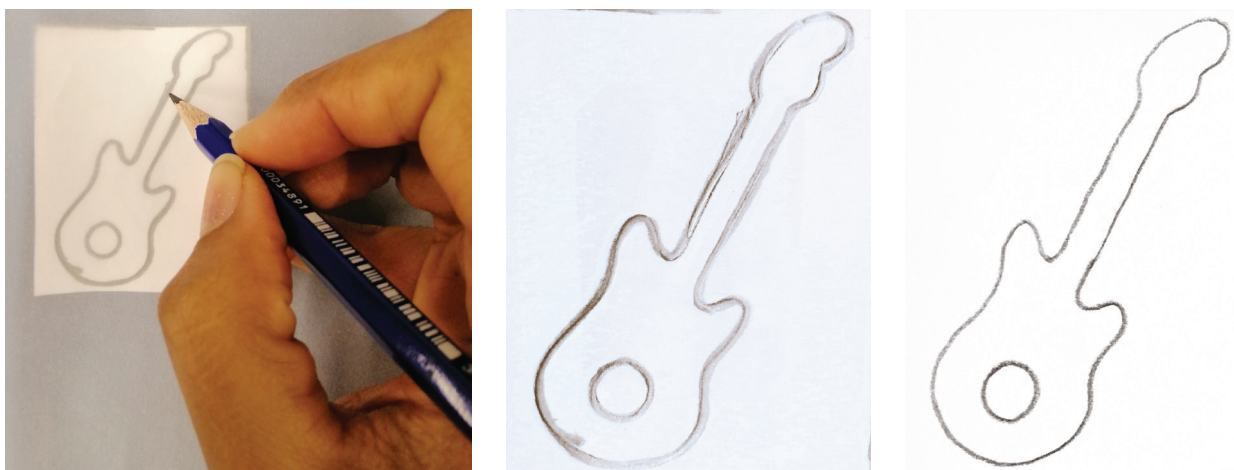

1. Select a musical instrument of your choice from the worksheet or from your research. Use the stylization process to create a motif. A simple and stylised motif is obtained by reducing an image's realistic features.

2. Draw the motif within a rectangle of dimension 5 x 6 cm.

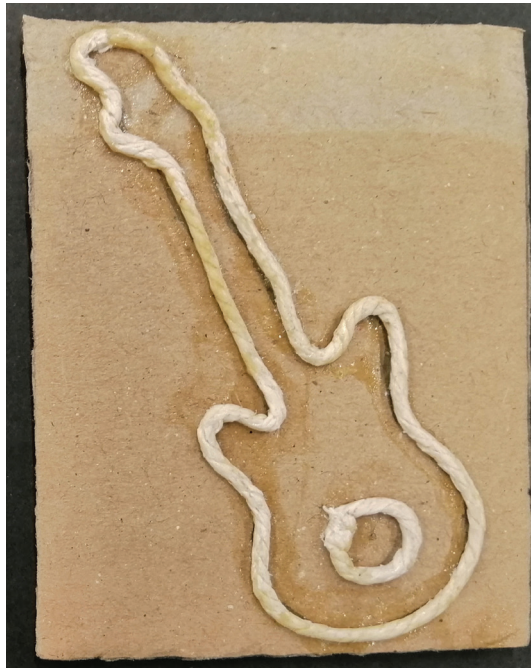

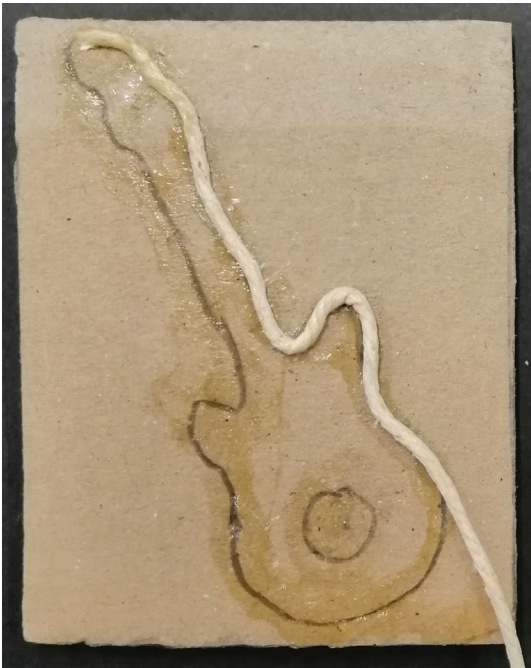

3. Place the tracing paper on the selected motif and trace it out using a dark toned pencil.

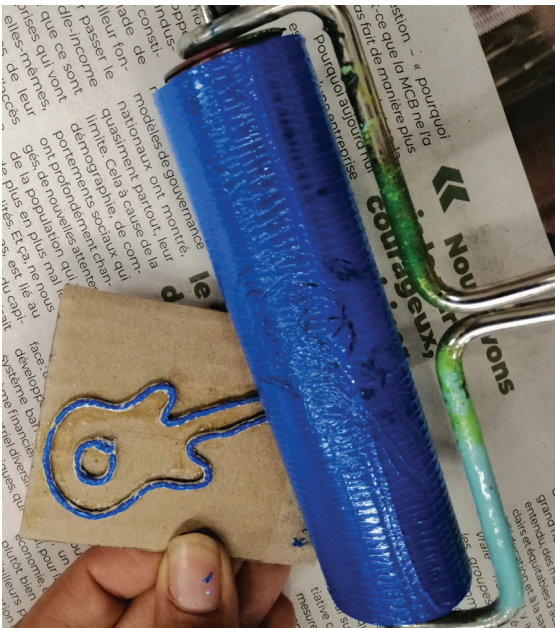

4. Apply a dark toned pencil on the visible drawing on the reverse. Then, use the tracing paper to transfer the motif on a cardboard of dimension 5 x 6 cm.

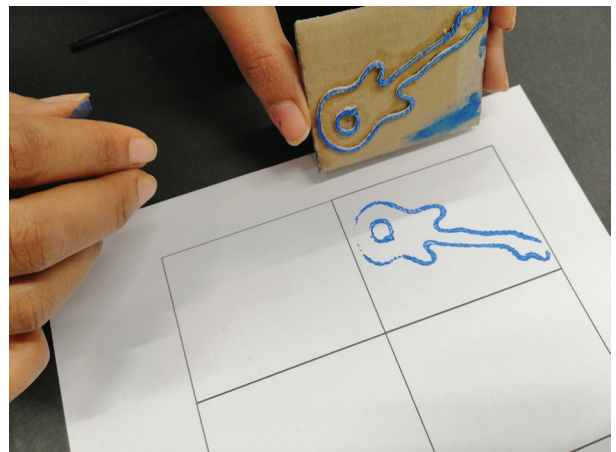

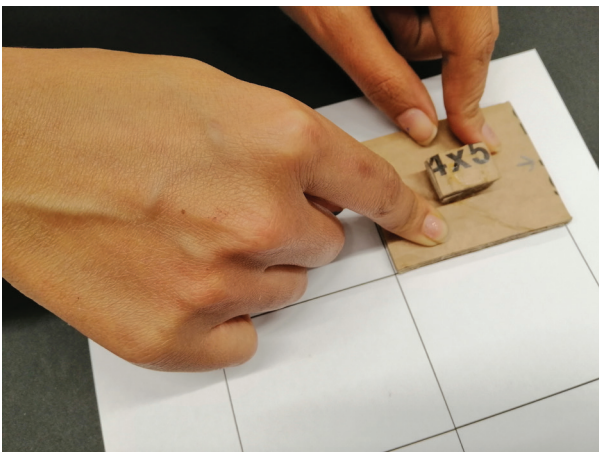

5. Glue the string onto the outline of the motif.

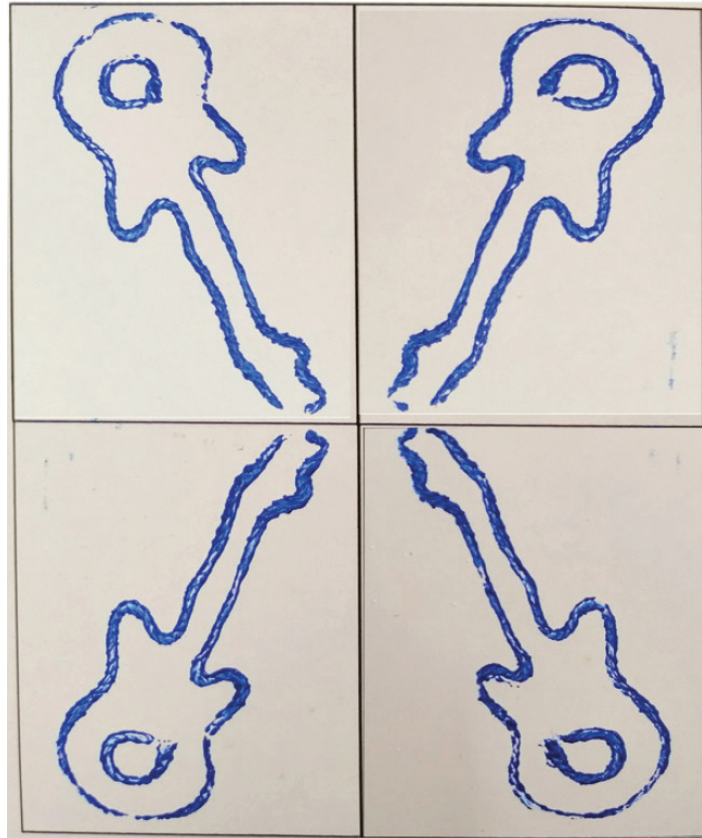

6. Apply paint onto the relief block using a roller or a paintbrush.

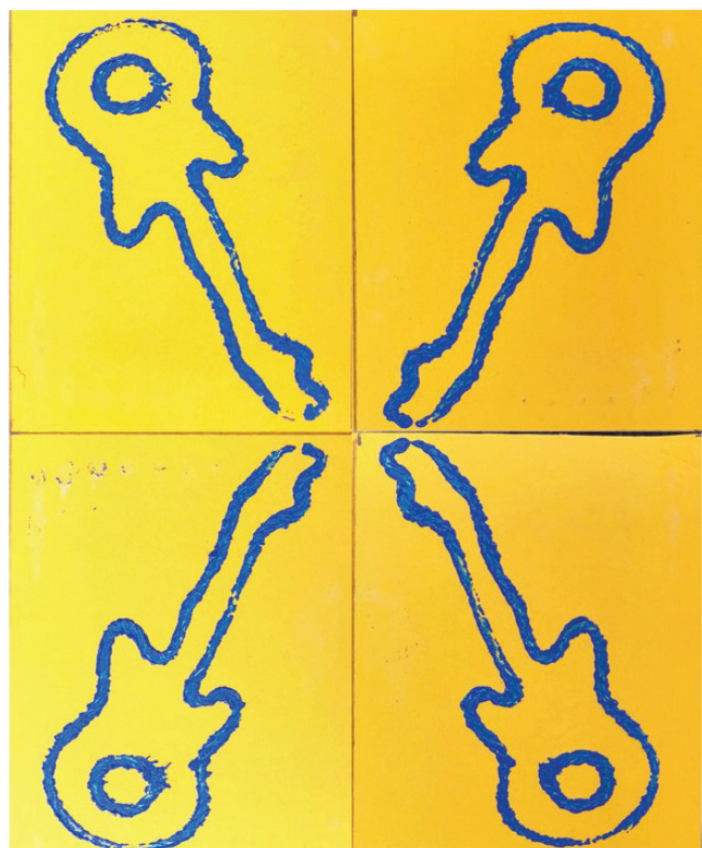

7. Carefully place the block, apply pressure and lift carefully to obtain a print.

8. Use the block to create a repeat pattern using string printing technique.
